GENERAL COMMENTS:

The shipment arrived in China in the late afternoon of January 1st and was subsequently transported to Guangzhou, where it was released for sale at the Jiangnan Market on the morning of January 3rd. Sixteen pallets were cleared during the morning sales period. The importer reported that the cherries displayed a generally sweet flavor and maintained good firmness. Some pitting and cracking were identified, but in low levels. Color consistency met the standards specified on the package labeling, with no meaningful variation observed within the shipment. Overall, buyer feedback was largely favorable, with strong appreciation for the fruit's freshness and quality.
